CHILL MODE ON

Why USHA air coolers?

USHA's range of powerful air coolers make them a must-have for the hottest days of the summer. They promise to bring you great respite even on peak days of dry heat, whether you are indoors or outdoors.

Air Performance

USHA air coolers come equipped with the latest in fan and blower technology to meet your heavy summer cooling needs.

- The fans and blowers are made of anti-corrosion ABS plastic/aluminum material for longer life and durability.
- Aerodynamically designed with a large sweep of up to 56 cm, the fans in USHA coolers provide you with powerful air throw up to 22 m.
- The 5-leaf fan effectively spreads air throughout the room along with delivering high volume of air.
- The USHA TPW (Tower/Personal/Window) cooler series comes with blowers of height upto 20.5 cm, which provide you powerful air throw.

EcoCOOL Honeycomb

USHA air coolers come with the best-in-class EcoCool pads that are a revolution in Honeycomb design.

- These EcoCool evaporative cooling pads, made of cellulose paper, are engineered from cross-sectional specially-treated fluted media and are capable of absorbing and retaining water for a longer period to provide maximum cooling efficiency. The cellulose media is treated with stiffening and rot-resisting agents as well as specialised odourless adhesives to increase its useful life and durability.

Benefits:

- **Effective Cooling:** Lowers temperature at minimal energy cost.
- **Energy Efficient:** Allows higher cooling with lower air volume; pads have saturation effectiveness.
- **Higher Operational Consistency:** The specially engineered fluted structure of EcoCool prevents sagging and clogging thus delivering cool air for longer period of time.
- **Maintenance Free:** EcoCool has a unique structure which does not allow dust and other dirt to settle on it.
- **More Effective:** EcoCool can treble the air velocity over the same area, compared to any other type of Honeycomb pads.

CHILL MODE ON

Ultra Durable Submersible Pump

USHA air coolers are powered by a state-of-the-art submersible pump.

The pump is concealed (from water) – referring to the magnetic roller assembly which is the heart of the pump responsible for water suction.

Being concealed, the pump supports uninterrupted performance, even when running on dirty or hard water.

The superior durability of this pump ensures efficient cooling season after season.

Doorstep Service

USHA's promise of excellent doorstep service

725+ service partners present in 437 cities across India.

Dedicated 2000+ trained service technicians to cater to all your service needs.

In-house customer care team with 100+ operators assisting customers at **USHAcore**® Toll Free No. 1800 1033 111 in 8 languages from 8am to 8pm. Complaint registration facility available through a web portal at care.usha.com and WhatsApp +91 8595108742 (24x7).

Auto Tank Fill with Float Valve Technology

Auto Tank Fill enables automatic filling and refilling for non-stop performance.

Auto Drain

Auto Drain function for motorised water drainage eliminates the chances of stagnant water collection.

Dust Filter

Filters out any dust entering the EcoCool pads for clean and dust-free air.

Ice Chamber

Ice chamber for cooling water which speeds up and increases cooling efficiency.

Shower Distribution Channel

Shower Distribution Channel for effective and even spread of water over the EcoCool pads.

Remote Control

Convenient air cooler control from a distance.

Low Water Alarm

Automated reminders to refill water.

Humidity Control

Adjust the water flow in your air cooler to control humidity.

Off Timer

Air cooler unit will turn to standby mode after the set off timer from 1 hour to 8 hours.

Advanced Fan Motor

Ball Bearing motor with auto resettable thermal overload protection.

COLD WAVE

Desert air coolers

Ideal for mid to large sized living areas and semi-outdoor spaces, USHA Desert air coolers are a must have for the hottest days of summer. Their large tank capacity and powerful airflow not only promise respite from heat for longer hours but also deliver amongst the most comfortable cooling experiences.

USHA'S new Aerostyle Electronic range of air coolers are the perfect blend of style and performance. Packed with multiple intelligent features, they ensure a powerful cooling experience. Fully closeable front louvres prevent entry of dust and mosquitoes, enabling easy maintenance.

85 L / 105 L

Electronic Control Panel with Remote Control:

Easy operation of all functions using the remote control from anywhere in the room.

Large 45.5 cm Fan Blade:

For powerful air throw and fast cooling.

Humidity Control with Auto Drain:

Manual knob helps you adjust water flow and gives option for draining water from tank automatically when required.

Ice Chamber with Shower distribution Channel:

Top shower dispensing channel for more effective spread of water over the honeycomb and thus better cooling.

Cooling Area: Up to 35 m² ***

OTHER FEATURES:

Power-off timer up to 8 hours | Empty tank / Low water alarm | Auto Swing through motorised vertical louvres movement | 55mm Thicker Superior EcoCool Honeycomb pad for better cooling efficiency | Dust filter for clean air | Fully Closable Front Louvres | 3 speed levels - Low / Medium / High | Water tank capacity 85 L / 105 L | Air throw up to 12 m | Concealed water pump for durability | Castor Wheels for easy Movability

COLD WAVE

Desert air coolers

DID YOU KNOW?

1. Dry, hot climate is a desert cooler's best friend.

Desert coolers cool air by passing it through water-soaked cooling pads. Hence they are highly effective in hot and low-humidity regions during peak summers. The drier the weather, the better the desert cooler cools.

2. Desert cooler is the eco-friendlier way to stay cool in summers.

Desert coolers use natural evaporative cooling with just water, making them an energy efficient and eco-friendly choice. Choosing a desert cooler is a simple step towards a more sustainable and a responsible way of staying cool.

3. Desert coolers save energy and money.

They consume less electricity, making them more energy-efficient and lighter on your pocket too.

STAY COOL

Personal air coolers

USHA's range of personal air coolers is light, zippy and stylish. Best for spot cooling, they can be placed in any corner of the room or directly by your side when you require a personalised cooling experience. These air coolers are not just a great fit aesthetically but they also provide convenience with their ease of portability.

The compact version of the powerful COOLBOY Personal air cooler, the MINI series comes with all the features of its large counterpart with the additional benefit of being compact and super portable. This air cooler is your perfect companion for a personalised cooling experience.

12 L / 18 L

Dust Filter: Dust filter, cleans the air entering into the honeycomb thereby reducing need for cleaning.

Power Consumption 80 W
With a power consumption of only 80 W, it's ideal to pair with invertors.

Super Compact Design: Makes it ideal to use for direct spot cooling or for smaller, less ventilated rooms like Pooja room/Kitchen/Small shops.

Cooling Area: Up to 8 m² ***

OTHER FEATURES:

Auto Swing through motorised vertical louvres | Thermal Safety Protection for motor and pump: TOP (Trip Over Protection) Auto resettable | Ultra Durable concealed pump for longer life | Fully collapsible horizontal louvres for protection of dust entry when cooler is not in use | Air throw up to 2.5 m | Large air suction / cooling pad area for better cooling efficiency | Castor wheels for easy movability (In 18 L only)

Model	Capacity	Length (L)	Width (W)	Height (H)
12CBP1	12 L	27 cm	29 cm	59.5 cm
18CBP1	18 L	27 cm	29 cm	72.5 cm

STAY COOL

Personal air coolers

DID YOU KNOW?

1. Personal Coolers love compact spaces

Like their name suggests, these coolers are best for cooling your personal spaces and work best in areas like bedrooms, study rooms, or small offices.

2. They are the eco-friendlier way to stay cool in summers.

Like desert coolers, they cool air naturally using water-soaked pads, hence causing zero harm to the environment. By opting for a personal cooler you also help protect the environment.

3. Personal coolers save energy and money.

They consume significantly less electricity, making them more energy-efficient and lighter on your pocket too.

4. They go where you go, at home or office.

Personal coolers are portable and compact. Most models come with castor wheels, so you can easily move them room to room, carrying your personal cool comfort with you.

SUMMER READY

Window air coolers

Window air coolers, as their name suggests, are air coolers which are best suited to be installed on the window frame. These air coolers, inspired from the conventional air coolers, are powerful, have a large tank capacity and take up virtually no floor space inside the house. In addition to all this, they come with honeycomb pads and superior grade plastic bodies, making them more durable and longer lasting than conventional air coolers.

USHA Azzuro Dlx Window Air Cooler is designed keeping convenience in mind. It comes with a front water inlet and an auto tank fill feature to make water filling as easy as possible. Moreover with its powerful airflow Azzuro Dlx becomes one of the best choices to beat the heat this summer.

Trolley is optional as an accessory

- 52 L**
-  **Trolley with Wheels:** Trolley with wheels for easy portability and air thrust at body level height.
-  **High Tank Capacity:** 52 L tank capacity for a longer cooling experience.
-  **Compact Design:** Installed like a window AC, it occupies the least space while providing one of the best cooling experiences for a room.
-  **Thermal Overload Protection Technology:** Motor is fitted with self-resettable TOP (Thermal Overload Protection) device to keep the motor safe from burning due to high temperatures.
-  **Cooling Area:** Up to 20 m² ***

OTHER FEATURES:

Auto Swing through motorised vertical louvres | Air throw up to 7.3 m | Thermal Safety Protection for motor and pump: TOP (Thermal Overload Protection) Auto resettable | 20 cm blower for powerful air delivery | 3 speed levels - Low / Medium / High | 220 W power consumption | Trolley with Castor Wheels: Easy Mobility | Water Level Indicator

Model	Capacity	Length (L)	Width (W)	Height (H)
